

Here's how Jon Welch upgraded an existing building...

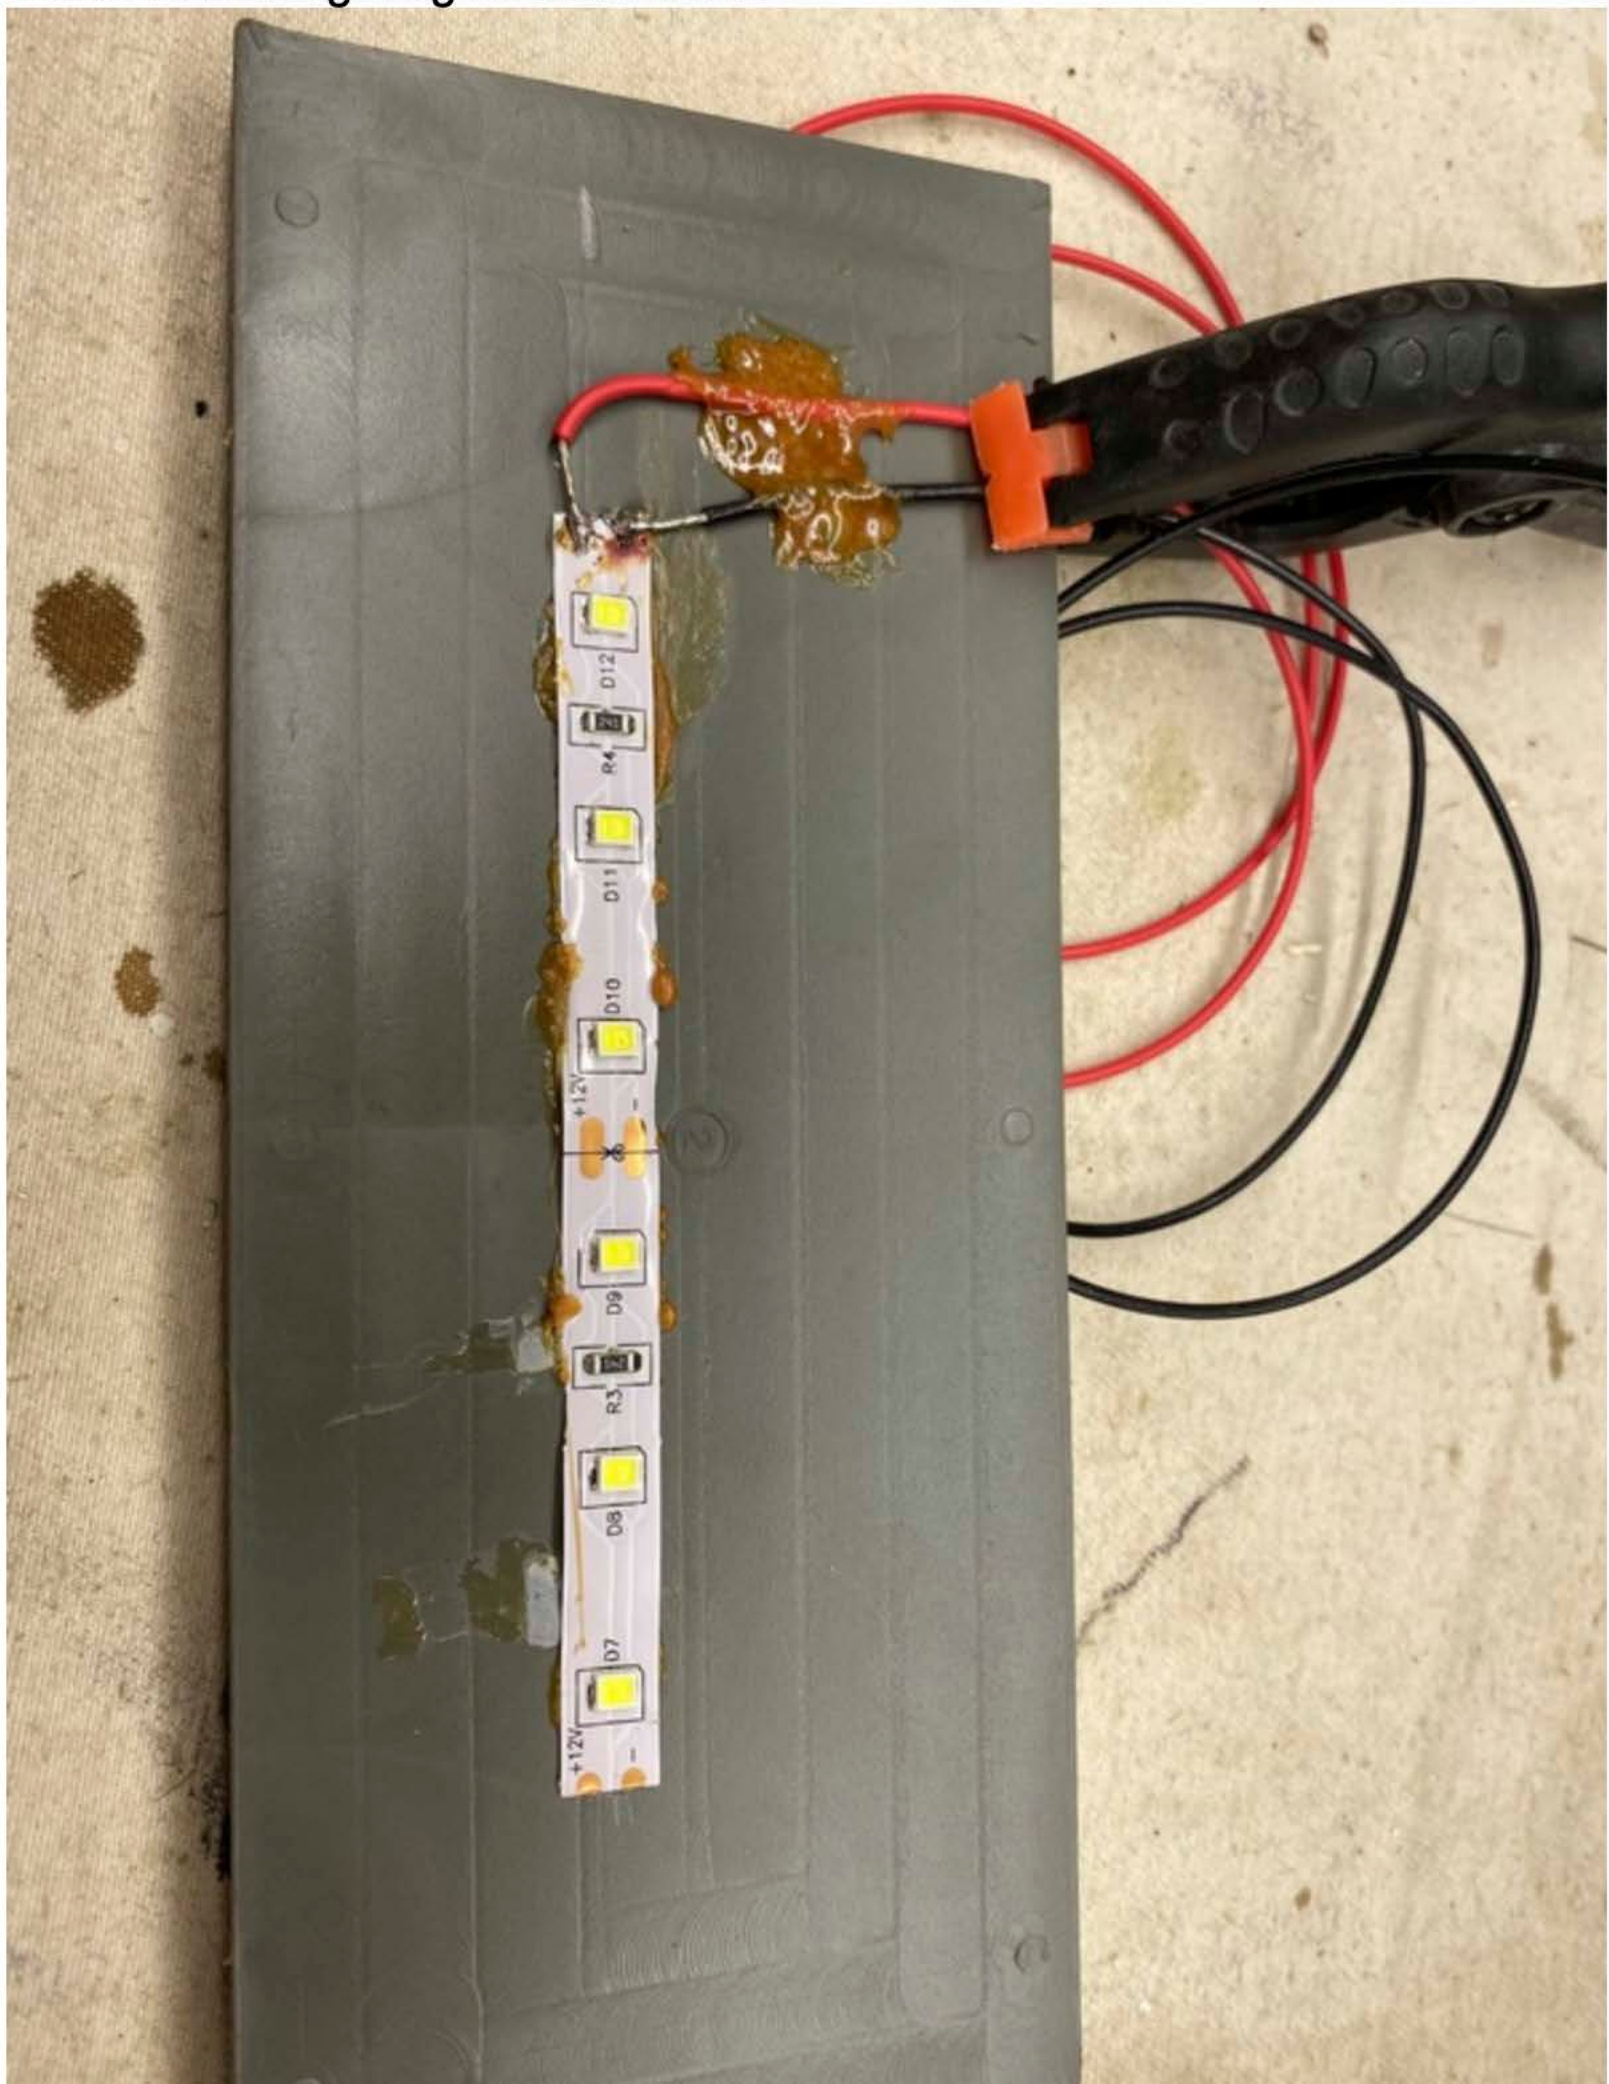

This is a kit I bought assembled years ago, today I decided to improve it, first I removed the roof to get inside, painted the interior walls a couple mottled colors

Put a black wash on roof

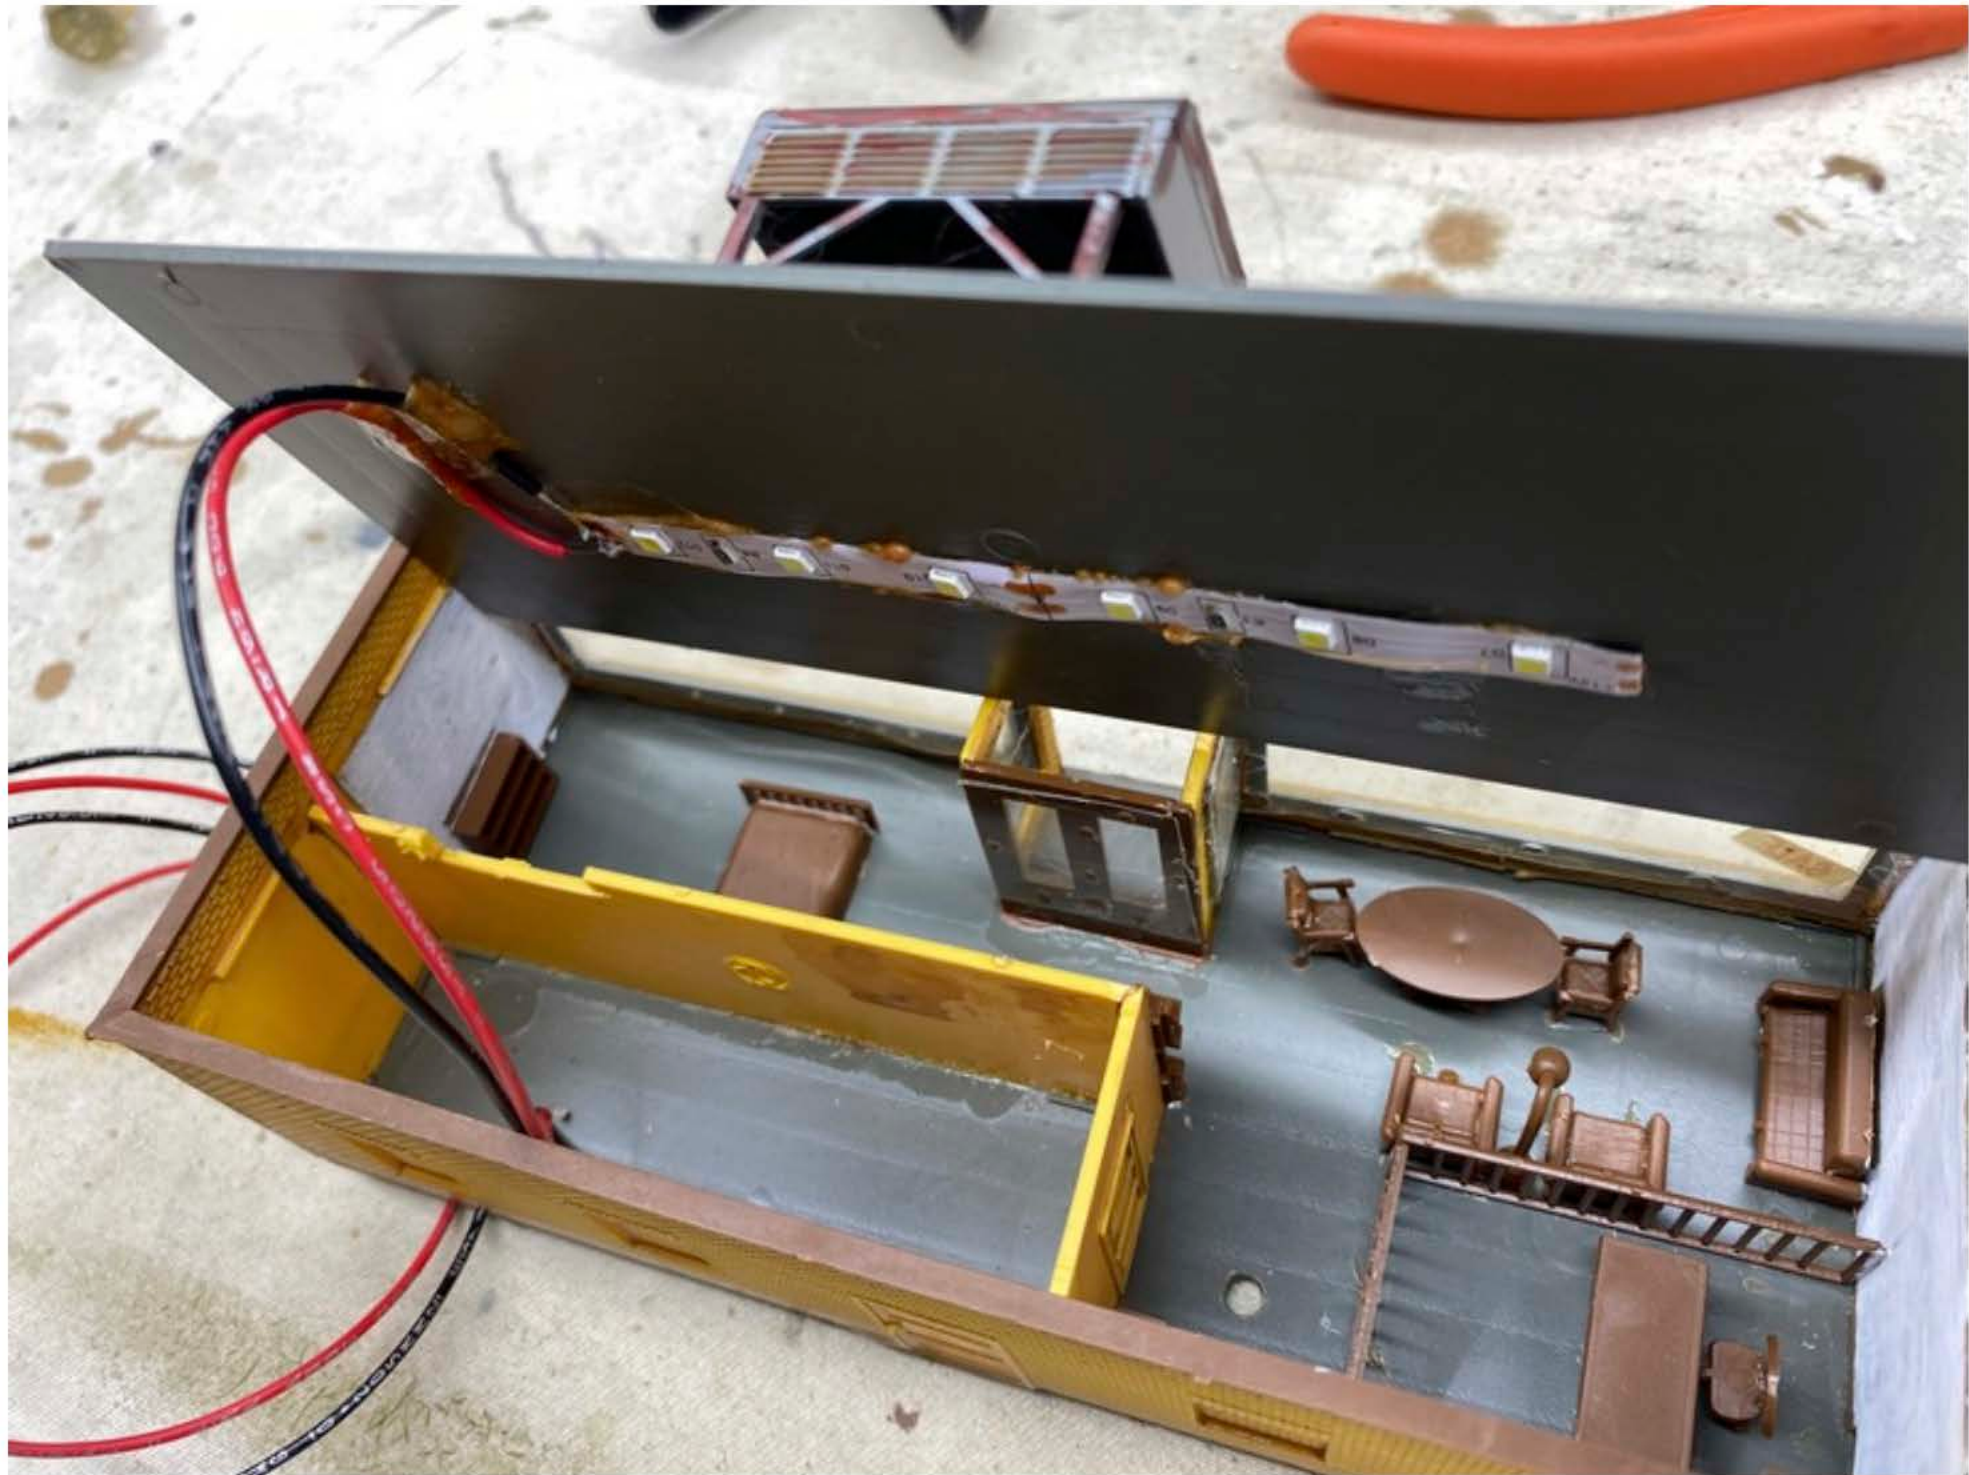

Installed LED lighting for the interior

A brown wash for brick mortar lines

Rust & dirt on roof details

Now wouldn't you want to buy your furniture here ? Be sure to read the small print on the sign... probably not up to All Potts standards, but it's all I got.
